<td>As people enter the room they will be directed to select from a number of pictures of various “tools.” They will select the picture that “speaks” to them and their role as a project participant. I will then ask the participants to find others with the same picture and discuss why they chose that particular picture. After about 5 minutes for discussion I will ask participants to share the key points of the discussion in their groups. (I will call back to some of these comments during my presentation.)</td>
<td>Tools of Engagement</td>

<td>It seems engaging, but I would give an introductory speech before everything gets started.</td>
</tr>
<tr>
<td>1</td>
<td>Research has shown that sixty percent of all projects fail to meet project goals in either scope, budget or quality. Another study found that 75% of IT project managers believe their software project will fail before it even starts! Study after study indicates that, with all the growth of project management methods and ideas, we’re still not getting the results we would like. Why is that? What are we missing? Different studies point to different key causes: lack of sponsor involvement, lack of team member accountability, lack of other resources...</td>

| 4      | However, the Gallup engagement study has shown that only 30% of employees in the US are engaged.  
And that same study shows that 17% of employees are actively disengaged. That means they are trying to be counter-productive! (These numbers have remained static for the last three years.)  
And if this is true of organizations in general, think of what that means to us as project managers, because it’s probably truer of projects. | ![30% engaged employees in US companies](image) | 1        | Ok           |

<td>So what can we do; and why haven’t we been more successful? I’m going to suggest that, as project managers and for organizations in general, when we’re trying to deal with problems of engagement we’re using the wrong toolbox. We’re using managers’ tools. We set the plans and deadlines and communicate them to the team members, and if we don’t get the results we need we escalate to functional managers or sponsors who step in and try to make them compliant. “You need to comply with the plan!” Deep down we all know that you can’t force people to be compliant. Products are compliant. Processes are compliant. Even service outcomes can be compliant.</td>

SAMPLE STORYBOARD (used with permission from Matt McCarty, mdmccarty9@gmail.com)
People are engaged. And the management tools are all about compliance, not engagement. Processes and things are managed. People are led. So I’m going to suggest that we need to use tools from the leadership toolbox. Specifically the “Serving Leadership” toolbox. Today you are going to pick up six specific tools from the serving leadership toolbox that you can use as project leaders to help foster an environment of engagement.

6 Those tools are:
1. Understand and articulate purpose
2. Focus on outcomes and strengths
3. Use engaging language
4. Listen to learn
5. Coach for growth
6. Evaluate to engage

There are two things I want you to understand about these tools as we talk about them. First of all, they build upon each other to form a system for building engagement. Second, each one has two facets: mindset and practice. The mindset is where you come to grips with how you are going to employ this tool.

| 7      | In his book, “Start With Why,” Simon Sinek illustrates this with what he calls the Golden Circle  
[explain and illustrate Sinek’s Golden Circle with flipchart]  
[examples of how organizations focus on the why, Kelly, Apple]  
As project managers we need to understand our why. And not only understand it, but articulate it. | [use flipchart to illustrate Sinek’s Golden Circle] | 3        | Ok           |
| 9      | If we can understand and articulate our why that supports intrinsic motivation  
[example of intrinsic motivation from Daniel Pink’s “Drive”]  
Intrinsic motivation in turn supports Empathetic collaboration. If we are all working towards the same why we can collaborate better. What empathetic collaboration means is that if I, as an IT project manager, know and understand what life is like for my colleagues in the finance department. I know what life is like for my colleagues in accounting at year end. And that makes me more willing to collaborate and, again, to use my discretionary time to help them out. | ![Diagram showing the Golden Circle with subcategories of Creative Autonomy, Empathetic Collaboration, Organizational Alignment/Cohesion, and Purpose/Why] | 3        | Ok           |

<td>When we focus on problems we pay attention to what we DON'T want. When we focus on outcomes we pay attention to what we DO want. A problem focus fuels anxiety and disengagement. We want to run away from our problems. An outcome focus fuels empowerment and engagement we come together to achieve our outcomes. Focusing on problems leads to reactive behaviors. We get stuck in fight, flight or freeze mode. Focusing on outcomes leads to creative behaviors and fosters innovative solutions to roadblocks and challenges. Focusing on problems is limiting, we tend to slow down or even retreat. Any progress is made cautiously [driving example] Focusing on (and celebrating) outcomes is accelerating. We are encouraged and tend to achieve our goals faster. [Story about S.P. Langley and Wright bros. and how they approached the problem of steering the craft.]</td>

</table>

Outcome Focus vs. Problem Focus

Focus on Problems
- Attention: What you DON'T want
- Fuels: Anxiety & Disengagement
- Outcomes: Reactive behaviors
- Effect: Limiting

Focus on Outcomes
- Attention: What you DO want
- Fuels: Engagement/Innovation
- Outcomes: Innovative behaviors
- Effect: Accelerating

I use a series of slides to differentiate between outcome and problem focus

Really great point

<td>15</td>
<td>It is so important to be aware of how you approach conversations. It’s a practical tool but it begins with a mindset. It’s helpful to think about how you are going to approach a conversation before you even begin that conversation. There are four things you can do to make sure your conversations are engaging. First is to identify your assumptions and biases. What do you think and feel about the particular team members on your team? Are they smart or are they stupid? Are they resourceful or are they lazy? Are they individuals who have something worthwhile to contribute or are they simply hands and feet to get done what you need to get done? If you find yourself in that latter camp then you may need to do some introspection on “where am I coming from?” “What’s my outlook?” And, “How can I bring myself to where I can see these people as contributors rather than just resources?” And that gets back to focusing on strengths.</td>

<td>Second, choose to have adult to adult conversations. What do I mean by that? Raise your hand if you are familiar with Transactional Analysis. [give a brief background of TA] In most management situations we are communicating in a Parent/Child relationship. “I’m going to tell you what I need you to do, you’re going to do it and then you’re going to tell me when it’s done.” Nobody likes being told what to do. Think about when you were a young adult and your parents said, “look, this is how it’s going to be.” You didn’t like it, right? We rebelled for a reason. The same is true for your team members. If you treat them like children, they’re going to become defensive and even rebellious. They will disengage. Choose instead to have Adult/Adult conversations. A simple way to think of this is that you honor the choice of the individual. In other words, I can describe the behavior that I want to see, or the outcome that I want to achieve, and I honor the choice of that individual to agree. I honor the choice of the individual whether or not to engage with me.</td>

**Session Title:** Tools of Engagement  
**Description:** The research on engaged employees having a positive impact on organizational effectiveness is overwhelming. Quite simply, higher engagement means higher productivity. The same is true for projects. In this session, you will pick up specific tools that will enable you to build trust, encourage creativity, and provide supportive feedback, so that you can build a fully engaged team that will help to ensure project success.  
**Audience Level:** Applied - Focus on understanding existing knowledge; appropriate for those interested in using content in practical applications to master concepts.  
**Learning Objective 1:** Apply outcome-focused tools to create an environment that fosters stakeholder and team member engagement.  
**Learning Objective 2:** Practice interacting and communicating with stakeholders and team members in a manner that enhances productivity.  
**Subtopics:** Change Management; Innovation; Talent Management  
**Duration:** 75 minutes

| 25     | To be an effective coach, it’s helpful to have a framework. I have developed a coaching framework I call the PRIDE framework. Here’s how it works:  
[Explain the PRIDE coaching framework] | Coaching for growth  
Prepare to coach  
Research outcomes  
Measure generation  
Decide on specific actions  
Evaluate and engage | 4 | Ok |
| 26     | The sixth tool, evaluate to engage, brings all the other tools together.  
Raise your hand if, when you think of evaluations, you think of once-a-year performance reviews.  
Evaluations should be used to reinforce as well as to correct. | 6. Evaluate to engage | 1 | True |
| 27     | Like all of the other tools, engagement works best if you plan ahead.  
Using a tool can be very helpful, especially when making corrections. It helps you stay focused on the desired outcome and keep emotions at bay. | Bring it all together with engaging evaluations  
Plan  
Use a tool  
Focus on outcomes & strengths  
Listen  
Coach for growth | 4 | Ok |

<tbody>
<tr>
<td></td>
<td>What are you going to say? How will you be describing the topic? Will there be an activity?</td>
<td>Image of draft slide or a brief description. Description should address both text and visuals, if applicable.</td>
<td>How many minutes will you be spending on this slide?</td>
<td>SME will use this column to provide feedback once the storyboard is uploaded</td>
</tr>
<tr>
<td>28</td>
<td>[Share the Providing Candid Feedback Tool] It is important to remember to use the other tools during your evaluation session: Listen to learn and coach for growth.</td>
<td>[none]</td>
<td>3</td>
<td>I would us these confrontation moments more often during the presentation, since the whole thing is about &quot;engagement&quot;</td>
</tr>
<tr>
<td>29</td>
<td>Leading people can be a challenge. Sometimes we think we are being efficient by attempting to force compliance on team members. It feels like the expedient thing to do. Personal compliance is the enemy of engagement. Remember that compliance is for processes; people need to be engaged. If you do the work to make sure your process are compliant and your people are engaged, success is virtually guaranteed. Learning to use these Tools of Engagement isn’t easy, but it’s worth the effort.</td>
<td>[Toolbox] 1. Understand &amp; articulate purpose 2. Focus on outcomes and strengths 3. Use engaging language 4. Listen to learn 5. Coach for growth 6. Encourage to engage</td>
<td>1</td>
<td>Really interesting presentation</td>
