For Immediate Release

Industry Visionary and Strategist will Share Vital's Enterprise Imaging Solutions at HIMSS AsiaPac '17

12th September, 2017 – Minnesota, USA – Vital Images' Chief Information Strategist will address their Vitrea® modular solutions at the HIMSS AsiaPac '17 conference. The annual event will be held September 11-14, at the Marina Bay Sands, Singapore.

Larry Sitka, Vital's Vice President/CSIO of Enterprise Applications, and pioneer of vendor neutral archives, will participate throughout the conference located at Vital's exhibit #317.

"We are looking forward to demonstrating 'Vitrea' our modular solution family that orchestrates data, making it accessible and providing context and clarity of information to the user - the user being the patient, physician, specialist, IT organisation, modalities, and, of course, Smart Learning Machines," says Mr. Sitka. "Vitrea is a singular solution that helps keep clinicians connected to the ever evolving patient story."

Vital – a leader in imaging and informatics – offers its solution based on three Vitrea pillars:

- Vitrea Connection – the engine that constantly renews and refreshes all relevant information from disparate sources in real-time and seamlessly delivers it to the applications at the point of care.
- Vitrea Vision – a modular viewing platform that is configured to meet the unique viewing needs of all users, providing access to relevant images from across the enterprise, anywhere, anytime.
- Vitrea Intelligence – helps imaging leaders run their operations efficiently and cost-effectively while ensuring the delivery of quality patient care.

"As a long-term Diamond sponsor, Vital is proud to continue participating in and making a positive difference to HIMSS and to our diverse range of customers and patients within Asia Pacific," explains Dr. Ravi Shrestha, General Manager, Asia Pacific.

About Vital Images:

Vital Images, Inc., a Toshiba Medical company, is a leading provider of diagnostic imaging and enterprise informatics solutions to help healthcare organisations deliver exceptional care while optimising resources across multi-facility organisations. The company's solutions are scalable to meet the unique needs of hospitals and imaging centers and are accessible throughout the enterprise anytime, anywhere.
