## IMSAs CERTIFICATION

With the ever-changing demands of technology today, it is more important than ever that properly trained and skilled technicians are available. IMSA Certifications indicate individuals have met prerequisite qualifications and passed an examination -- from an impartial, nationally-recognized association -- to determine they are qualified to perform specific technical tasks. IMSA has been globally recognized as the leader in public safety certifications since 1982 with over 100,000 certifications issued.

This year, along with the traditional suite of certification programs we are pleased to offer a new 3-day Certified Fiber Optic Technician program which combines both theory and hands-on skills into one certification. Other notable offerings include Transportation Center System Specialist, Traffic Inspector for Advanced Technologies and updated Interior Fire Alarm Technician programs.

## OPENING CEREMONY

Sunday, July 9 at 4:00pm  
 All registered attendees please join us to officially kick off the 2017 Forum & Expo with Keynote Speaker AZ Senator & Transportation Vice Chair Karen Fann, awards, a special raffle prize sponsored by the Arizona Section, and more.
