

PRESENTED BY THE ENERGY POLICY INSTITUTE OF AUSTRALIA | 18 MARCH 2016 | AMORA HOTEL, SYDNEY

After Paris: integrating energy and climate policy

The aim of Australia's energy vision should be to optimise the reliable and affordable supply of energy and to do this in a sustainable and environmentally acceptable way. Greenhouse gas emissions need to be reduced. At the same time, Australia must provide its major trading partners with the energy security they need.

ESON 2016 will focus on a long-term energy vision as the foundation for Australia's energy policy but it will also debate how to accelerate all forms of low-emissions energy innovation.
