

## Join ThreatMetrix at Our MRC e-Commerce Merchant Community Roundtable

Please join ThreatMetrix®, the fastest-growing provider of context-based security and advanced fraud prevention solutions, at this year's MRC for our e-commerce merchant community roundtable.

This ThreatMetrix-sponsored event, moderated by Carmen Honacker, ThreatMetrix Director of Customer Advocacy, is designed for like-minded fraud-fighting practitioners to openly collaborate, share information, and network about all things relating to fraud. Please note that attendees do not have to be a ThreatMetrix customer to participate.

By attending, you'll have the opportunity to learn first-hand from your industry peers and experts about emerging threats, best practices and strategies to fight fraud. Your participation will ensure that you have direct, one-on-one interactions with others who share your challenges and interests.

At ThreatMetrix, we've always focused on helping businesses fight cybercrime. This means empowering businesses to not only keep out the bad players, but also to create a secure, frictionless online experience for customers.

"The global cybercrime landscape is evolving in real-time to include new, more sophisticated threats and the only way to combat these threats is through collective intelligence, collaboration and a community-based approach," said ThreatMetrix President and CEO Reed Taussig. "Cybercrime isn't a threat any one business can fight alone. It requires a community that leverages intelligence from like-minded industry professionals."
