DIGITAL EQUALIZER

- *Transforming School Ecosystem*

Digital Equalizer (DE) program is an education program focusing on leveraging the use of technology in bridging the educational and digital divide in India and transforming under-resourced schools into dynamic places to teach and learn through collaborative, project-based learning.

TECHNOLOGY ENABLED FINANCIAL EDUCATION IN SCHOOLS

TEFES

MODULE-1

The what and how of money

Financial literacy curriculum

The program focuses on digitizing financial education and uses audio visual and smart classrooms to deliver financial education as an integrated part of the Indian school curriculum to 12,000 children in 200 Government schools in Delhi, Odisha and Punjab. The program uses innovative tools to measure changes in financial knowledge, skills and attitude.

FLIPPED CLASSROOMS

In this methodology students learn new concepts through video lectures and handouts, and what used to be homework (assigned problems) is now done in class with teachers offering more personalized guidance, self-paced learning and interaction with students, instead of lecturing.

Thank You!
